DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 44 - 60 rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1 246 097 (hereinafter '097) in view of U.S. Patent Application No. 2002/0131399 (Philonenko).

The '097 reference teaches the claimed limitations, see paragraphs 0003, 0006, 0011 and 0129 see also Figs 4 and 6 for multiple workgroups (workgroups 1 and 2), predicting surpluses (paragraph 0014). With respect to monitoring note paragraphs 0037, 0039, 0054 - 0055, 0111 and figures 3 and 4, this illustrates priorities of enqueued contacts and anticipated workloads. It would have been obvious to one of ordinary skill in the art to modify the '097 reference to include the monitoring aspects of Philonenko because the present invention is merely a combination of old elements, and each element of the combination would have preformed the same function as it would separately and as such one of ordinary skill would have recognized that the results of the combination were predictable.
